## TABLES I-V FOOTNOTES

<sup>1</sup> Unless noted otherwise, enrollment figures were taken from the *Directory of Public Elementary and Secondary Schools in Selected Districts, Enrollment and Staff by Racial/Ethnic Group*, Fall 1972, U.S. Department of Health, Education and Welfare, Office for Civil Rights. Because the suspension figures reported to the Office for Civil Rights in the fall of 1973 were for the previous school year, they had to be compared, where possible, to the school districts' enrollments in the fall of 1972.

<sup>2</sup> Generally, for purposes of these tabulations, any schools serving grade six or grades lower than six were classified as "elementary" schools. However, in districts operating only one school serving all 12 grades, the one school was classified as a secondary school. Ungraded schools and other special schools, such as those serving various types of handicapped students, were classified as elementary schools unless it was clear that the special schools served only secondary students.

<sup>3</sup> For purposes of these tabulations, "secondary" schools include single schools serving all twelve grades, other schools serving no grades lower than seventh grade, and ungraded schools and other special schools clearly serving junior and senior high school students.

<sup>4</sup> These figures were compiled from the Individual School Campus Reports (Form OS/CR 102) submitted to the Office for Civil Rights of the Department of Health, Education and Welfare in the fall of 1973. Because the data regarding suspensions were not edited by the Office for Civil Rights, these tabulations represent conservative interpretations of the figures reported. Suspension figures for individual schools were not used unless information on both the number of students suspended at least once and the total number of suspension days was supplied. An exception to this rule was made if no suspension days were recorded for any of the schools in a district. The suspension data for individual schools were also not used when obvious errors were recognized. For example, when the number of students of a particular race that were suspended exceeded the total number of students of that race in the school in the 1972-1973 school year, neither the suspensions nor suspension days were counted. Obvious arithmetical errors were corrected. The figures compiled from the Individual School Campus Reports tend to be an undercount, not only for the reasons described above, but also because, in a number of the school districts reporting, "no information available" was recorded for certain schools, particularly junior

and senior high schools where suspensions are more apt to occur. Some school districts only reported to OCR suspensions over a certain number of days, thus many more students were affected by suspensions than are reflected here.

<sup>5</sup> It should be noted that these percentages tend to understate the extent to which suspensions are being used because they reflect the percentage of the total enrollment that was suspended at least once, while the great majority of suspensions occur at the junior and senior high school level.

<sup>6</sup> This school, in Crawfordsville, served grades 3-12.

<sup>7</sup> The Fall 1972 *Directory of Public Elementary and Secondary Schools*, p. 53, reflected that Harmony Grove School District No. 1 had two schools serving grades 1-6 and 7-12 respectively. In reporting its suspension data to OCR in the fall of 1973, Harmony Grove reported these two schools as one campus serving grades K-12. In order to accurately report the suspension data, the district was recorded as having one school.

<sup>8</sup> The Fall 1972 *Directory of Public Elementary and Secondary Schools*, p. 54, reflected that the Helena-West Helena School District had four secondary schools serving grades 7, 8, 9-10, and 11-12 respectively. In reporting its suspension data to OCR in the fall of 1973, Helena-West Helena reported these four schools as two campuses, one serving grades 7-8 and one grades 9-12. In order to accurately report the suspension data, the district was recorded as having two secondary schools.

<sup>9</sup> 1972-1973 enrollment figures were not available for the Lakeside School District, so 1973--1974 enrollment data from Form OS/CR 101 were used.

<sup>10</sup> No suspension days were recorded for the schools in the Lakeside School District.

<sup>11</sup> Because no suspension days were reported for the schools in Lakeside, the suspensions should not be counted when comparisons of suspensions and suspension days are made.

<sup>12</sup> The Baltimore City School District did not provide a racial breakdown of its suspension figures.

<sup>13</sup> There are 140 students in Baltimore County who were suspended for 210 days who are included in the total, but for whom no racial or ethnic breakdown was reported.

## 27a

<sup>14</sup> There are 29 students in Howard County who were suspended for 106 days who are included in the total, but for whom no racial or ethnic breakdown was reported.

<sup>15</sup> There are 18 students in Somerset County who were suspended for 54 days who are included in the total, but for whom no racial or ethnic breakdown was reported.

<sup>16</sup> Because no suspension days were reported for any of the schools in Worcester County, the suspensions should not be counted when comparisons of suspensions and suspension days are made.

<sup>17</sup> There are a total of 1,870 students (suspended for 64,553 days) in four school districts who are included in the total of the number of students suspended and suspension days but for whom no racial or ethnic identification was reported.

<sup>18</sup> Because the Baltimore City School District did not provide a racial breakdown of suspended students, the white enrollment (57,350) in the district was not counted when the percent of white students suspended in the surveyed districts was computed.

<sup>19</sup> Because the Baltimore City School District did not provide a racial breakdown of suspended students, the black enrollment (129,250) in the district was not counted when the percent of black students suspended in the surveyed districts was computed.

<sup>20</sup> In order to accurately report the suspension data for the Asbury Park District, 1973-1974 enrollment figures had to be used because the middle school in Asbury Park was not included in the enrollment figures in the Fall 1972 *Directory of Public Elementary and Secondary Schools*, p. 821.

<sup>21</sup> There were 467 students in Asbury Park who were suspended for 1,401 days who are included in the total, but for whom no racial or ethnic identification was reported.

<sup>22</sup> There were 987 students in Bridgeton who were suspended for 2,981 days who are included in the total but not in the racial and ethnic breakdowns because no racial or ethnic data were provided for suspension days. If the 987 students (27 white, 430 black and 530 Spanish-surnamed American) had been counted, the percentages, by race and ethnic group, would have been 26.1, 34.1 and 32.5, respectively.

<sup>23</sup> The Downe Township District reported that it keeps no information on suspensions by race and no information on suspension days.

## 28a

<sup>24</sup> There was one student in Ewing Township who was suspended for one day who is included in the total, but for whom no racial or ethnic identification was reported.

<sup>25</sup> Because 1972-1973 enrollment figures were not available for Fairfield Borough, 1973-1974 enrollment data from Form OS/CR 101 were used.

<sup>26</sup> Because 1972-1973 enrollment figures were not available for Fairfield Township, 1973-1974 enrollment data from Form OC/CR 101 were used.

<sup>27</sup> There were nine students in Hillside who were suspended for 20 days who are included in the total but not in the racial and ethnic breakdowns because no racial and ethnic data on suspension days were provided.

<sup>28</sup> There were 158 students in Jersey City who were suspended for 1,273 days who are included in the total but not in the racial and ethnic breakdowns because no racial and ethnic data on suspension days were provided. If the 158 students (20 white, 127 black and 11 Spanish-surnamed American) had been counted, the percentages, by race and ethnic group, would have been 1.2, 2.5 and 1.0 respectively.

<sup>29</sup> Because 1972-1973 enrollment figures were not available for Morris, 1973-1974 enrollment data from Form OS/CR 101 were used.

<sup>30</sup> Twelve students, suspended for 24 days, are included in the total for Morris but not in the racial or ethnic breakdowns because no racial or ethnic data on suspension days were reported.

<sup>31</sup> There were 189 students suspended for 1,317 days, who are included in the total for Neptune Township, but for whom no racial or ethnic identification was reported.

<sup>32</sup> There were 794 students, suspended for 1,402 days, who are included in the total for North Bergen, but for whom no racial or ethnic identification was reported.

<sup>33</sup> There were 393 students, suspended for 1,270 days, in Paterson who are included in the total but not in the racial and ethnic breakdowns because no racial and ethnic data on suspension days were provided. If the 393 students (36 white, 328 black and 29 Spanish-surnamed American) had been counted, the percentages, by race and ethnic group, would have been 1.8, 7.4 and 2.4, respectively.

## 29a

<sup>34</sup> The Roselle District reported that it had no information available, by race or ethnic group, on students suspended or suspension days.

<sup>35</sup> There were nine students, suspended for 45 days, in Trenton who are included in the total but not in the racial and ethnic breakdowns because no racial and ethnic data on suspension days were provided. There were also an additional 745 students who were suspended who are not counted at all, for purposes of our tabulations, because no information on suspension days was reported.

<sup>36</sup> There were 1,763 students, suspended for 6,276 days, who are included in the total for Willingboro, but for whom no racial or ethnic identification was reported.

<sup>37</sup> Because 1972-1973 enrollment figures were not available for Woodbury, 1973-1974 enrollment data from Form OS/CR 101 were used.

<sup>38</sup> There were 5,290 students, suspended for 17,243 days, who are included in the total, but for whom no racial or ethnic identification on students suspended and/or suspension days were reported.

<sup>39</sup> Because no suspension days were reported for the schools in Down Township, the suspensions should not be counted when comparisons of suspensions and suspension days are made.

<sup>40</sup> Because neither Downe Township nor Roselle provided a racial or ethnic breakdown of suspended students the enrollments in these two districts (2,267 white, 1,432 black, 91 Spanish-surnamed American) were not counted when the percentage of students suspended, by race and ethnic group, in the surveyed districts was computed.

<sup>41</sup> There are 229 students in Cincinnati who were suspended for 687 days who are included in the total, but for whom no racial or ethnic identification was reported.

<sup>42</sup> There are 219 students in Mt. Healthy who were suspended for 882 days who are included in the total, but for whom no racial or ethnic identification was reported.

<sup>43</sup> There is a significant discrepancy here between reported suspensions and suspension days because for some of the schools in this district both out-of-school and in-school suspensions (for which there are no suspension days) were recorded. Where it was possible to distinguish, in-school suspensions were not included in the count.

<sup>44</sup> There are 27 students in Youngstown who were suspended for 79 days who are included in the total, but for whom no racial or ethnic identification was reported.

<sup>45</sup> There are a total of 475 students (suspended for 1,648 days) in three districts who are included in the total number of students suspended but for whom no racial or ethnic identification was provided.

<sup>46</sup> Because the Columbus School District reported that no information was available regarding suspensions, the enrollment in Columbus was not included when the percentages were computed.

<sup>47</sup> The suspension figures for individual districts were drawn from the table entitled "Student Suspensions and Expulsions in South Carolina School Districts, 1972-1973" at pp. 14-16 of "Do Unto Others . . . A Report on School Districts' Compliance With South Carolina's 1973 'Student Discipline Law' ", *Your Schools*, Special Report, April 1974, published by the South Carolina Community Relations Program of the American Friends Service Committee. The figures in that table were taken from the School System Summary Reports (Form OS/CR 101, Item VII.B.) submitted to the Office for Civil Rights of the Department of Health, Education and Welfare in the fall of 1973.

<sup>48</sup> Students who were recorded in the table in *Your Schools* as "other" were identified further by checking back to the School System Summary Report (Form OS/CR 101, Item VII. B.).

<sup>49</sup> "Other" includes students identified on Form OS/CR 101 as American Indian or Asian American.

<sup>50</sup> No racial breakdown of the 16 suspensions reported in Anderson County No. 4 was included in Item VII. B. on Form OS/CR 101.

<sup>51</sup> The enrollment figures here do not include two schools which were recorded as being in Richland County No. 1 in the *Directory of Public Elementary and Secondary Schools in Selected Districts*, Fall 1972, p. 1264, but were not in fact part of the public school system. The two schools, John G. Richards for Boys and Willow Lane School for Girls, are correctional institutions.

<sup>52</sup> The figures for the Saluda County School District include enrollment and suspension figures for Hollywood School District No. 4 which was operative during the 1972-1973 school year but is no longer operative.

## 31a

<sup>53</sup> The total includes 16 students who were suspended in Anderson County No. 4 for whom no racial breakdown was reported.

<sup>54</sup> Because Anderson County No. 4 did not provide a racial breakdown of suspended students, the white enrollment (1,520) in the district was not counted when the percent of white students suspended in the surveyed districts was computed.

<sup>55</sup> Because Anderson County No. 4 did not provide a racial breakdown of suspended students, the black enrollment (737) in the district was not counted when the percent of black students suspended in the surveyed district was computed.

**APPENDIX B****Student Suspensions Since the Beginning of the 1972-73 School Year as Reported to Staff of the Children's Defense Fund**

As part of an extensive survey of children out of school in 17 school districts throughout the country, the Children's Defense Fund of the Washington Research Project, Inc. attempted to determine the extent to which suspensions were a common method of discipline employed by the schools in those districts. Indeed, the study showed that 4.4 percent of all school-age children surveyed were suspended and 7.9 percent of all secondary school-age children surveyed were suspended. In 11 of the 30 areas surveyed, over 10 percent of the secondary school-age children were suspended. Over 15 percent of the secondary school-age children were suspended in four of the areas. In addition, monitors found that 24 percent of the children suspended at least once were, in fact, suspended three or more times.

This information was gathered using a uniform questionnaire which included questions about the number of children who had been suspended, the frequency and duration of the suspensions, the reasons for the suspensions, and the procedures—regarding notification, hearing, and readmittance—which accompanied the disciplinary actions. Staff monitors visited more than 8,000 households in nine states and the District of Columbia—specifically, parts of Autauga County and Montgomery, Alabama; Denver, Colorado; Hancock County and Macon, Georgia; Davenport, Iowa; Floyd County, Kentucky; Portland, Maine; Cambridge, Holyoke, New Bedford, Somerville and Springfield, Massachusetts; Canton, Mississippi; Columbia and Sumter County, South Carolina; and Washington, D.C.

The areas surveyed—census tracts and housing projects in urban areas, and parts of rural counties—were selected on the basis of specific census measures including racial and ethnic population, income, family size, and number of children under 18 years old and on the basis of information

gathered from community contacts. In an effort to cover more households than the Census Bureau did in the 15 percent sample through which it gathered information on children not enrolled in school, Children's Defense Fund staff members visited at least every fourth household. Interviewing in these areas took place between July 1973 and March 1974.

There are three tables which follow: Table I shows, for each area surveyed, the number and percent of school-age children by age level, suspended from school at least once since the beginning of the 1972-73 school year and the total number of suspensions involved. Since 90 percent of the children suspended at least once were secondary school-age students, Tables II and III describe, for each area surveyed where more than three percent of the 12-17 year-olds were suspended, the number of times these students were suspended (Table II) and the durations of these suspensions (Table III). The raw data from which these tables were prepared is available at the Washington Office of the Children's Defense Fund, 1763 R Street, N.W., Washington, D.C.
